SE/2022/025 - Vindya Wickramathilaka

SE/2022/041 - Ramesh Krishan

Supervisor – Eng. Dr. Tiroshan Madushanka

SithCare: Fact-Finding Questionnaire (Mental Health Counsellor Focus)

Section 1: Specialization & Patient Engagement

1. What is your primary area of counselling expertise?
2. In your experience, what are the biggest barriers preventing clients in Sri Lanka from committing to ongoing counselling sessions?

Section 2: Tele-Counselling & Digital Tools

3. How comfortable are you conducting full, structured therapy sessions via online video?
4. Therapy sessions can involve highly emotional moments. If a video call drops due to internet latency, how critical is a seamless "one-tap phone call fallback"?
5. SithCare features a simplified "Adult Mode" designed for older adults. For your elderly clients, what features are most important to have easily accessible?

Section 3: Community & Volunteer Support Boundaries

6. As a professional counsellor, what specific training modules do you believe are absolutely mandatory for our Volunteer Listeners to prevent them from overstepping into clinical territory?
7. Under what conditions do you believe an "Anonymous Community Consultation Mode" (peer-to-peer advice using pseudonyms) is safe for users?

Section 4: Crisis & Safety Protocols

8. SithCare includes an AI chatbot for initial triage to direct users to the right resources. What specific conversational patterns should trigger the AI to immediately route the user to a crisis helpline instead of booking a future appointment?

Interview Questionnaire for Mental Health Patients – SithCare Channeling App

9. The platform allows patients to manually share their live location with emergency responders during a crisis. Do you have any concerns regarding this feature from a patient confidentiality standpoint?
