Introduction

Welcome to the SithCare User Experience & Accessibility Survey.

We are a group of undergraduate students from the Department of Software Engineering, University of Kelaniya, currently conducting our SENG 31242 – System Design Project.

Our proposed system, SithCare, is a mental health support and telemedicine platform designed to improve accessibility, privacy, and convenience for individuals seeking mental health services in Sri Lanka.

The purpose of this questionnaire is to gather user opinions and preferences related to:

- User Interface (UI) design
- User Experience (UX)
- Accessibility features
- Dashboard layouts
- Telemedicine usability
- Navigation preferences
- General platform features

Your feedback will help us design a more user-friendly and accessible platform suitable for different types of users.

Privacy Notice

⚠ This survey does NOT collect personal or sensitive information such as:
