Interview Questionnaire for Mental Health Specialists

Group 10

SE/2022/046 - Lochithya Hettiarachchi

SE/2022/005 - Anushka Dilinuwan

SE/2022/010 - Adhithya Jayawardhana

SE/2022/025 - Vindya Wickramathilaka

SE/2022/041 - Ramesh Krishan

Supervisor – Eng. Dr. Tiroshan Madushanka

SithCare: Fact-Finding Questionnaire (Mental Health Specialist Focus)

Section 1: Professional Background & Current Landscape

1. What is your primary area of specialization?
2. In your experience, what are the most common barriers that prevent patients in Sri Lanka from seeking your professional help?
3. How do you currently handle patients who require support in different languages (Sinhala, Tamil, English)?

Section 2: Telemedicine & Digital Accessibility

4. How comfortable are you with conducting online video consultations for mental health assessments?
5. Given potential internet latency and reliability issues in Sri Lanka, how critical is a "one-tap phone call fallback" if a video consultation drops?
6. SithCare proposes a simplified "Adult Mode" with reduced menu complexity for elderly patients. In your opinion, what essential features should remain immediately visible in this simplified view?

Section 3: Appointment & Clinic Management

7. How do you currently manage schedules across multiple clinic branches, and would a centralized system linking you to multiple locations be useful?
8. Would a "Live Patient Queue Tracker" (allowing waiting patients to estimate their turn) be beneficial, or could it potentially cause anxiety for patients waiting at the clinic desk?
9. Do you currently set aside specific time slots for emergency, same-day bookings when your regular schedule is full?

Section 4: Emergency Support & Patient Safety

10. SithCare features a "Crisis Direct Call" for emergencies. Under what conditions (if any) would you be willing to accept direct emergency calls through the platform?
11. The application includes a feature where patients can manually share their live location with emergency responders during a crisis. Do you foresee any specific liability risks or necessary safeguards for this feature?

Section 5: AI Triage & Volunteer Support

12. SithCare plans to use an AI chatbot strictly for basic mental health triage to suggest suitable specialist categories. What specific conversational "red flags" should the AI be programmed to escalate immediately to emergency helplines?
13. We are incorporating a "Trained Volunteer Listener Program" to provide emotional support for loneliness and stress without giving medical advice. What specific mental health first-aid training modules do you believe are mandatory for these volunteers?
14. What are your professional thoughts on patients engaging in an "Anonymous Community Consultation Mode" using pseudonyms to share experiences and seek peer advice?
